

Featured Products

McKenzie XTreme Series 3D Targets
McKenzie (800-708-0673; www.mckenzie3d.com) is offering 14 new XTreme Series 3D targets. The E-Z Flex foam replaceable cores allow easy arrow removal.

Norway Fusion Vanes
New, lightweight 2-inch Fusion vanes from Norway (800-778-4755; www.duravanes.com) are great for 3-D and on through the hunting season, as they're designed to improve broadhead flight. Vane profile increases surface area at the most critical point.

Delta Speed Bag Targets
Delta's new Speed Bag series targets are engineered for high-speed, high-performance bows. These brightly colored rectangular targets (800-708-0673; www.deltatargets.net) have replaceable heavy-duty 6.5 oz. covers and are available in 3 sizes: The Mini (28x28x12: \$32), The Speed Bag (24x24x10: \$44) and The XT (20x20x8: \$55).

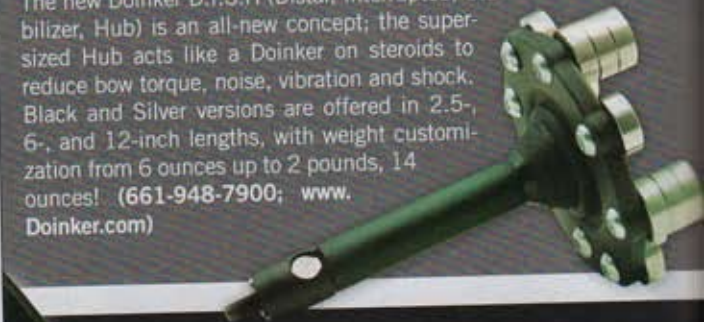

Shrewd Archery Grips
Shrewd's (540-389-8609; www.shrewdarchery.com) Mathews Right Hand Standard Grips are now available in Dark Brown and Dark Green Camo, in CNC machined anodized aluminum (will fit all Mathews Bows with a wood grip, except Mustang & Ignition).

New cold-weather-friendly Delrin Plastic grips are available only in Black for Mathews and BowTech bows.

Doinker D.I.S.H. Stabilizer

The new Doinker D.I.S.H. (Distal, Interrupted, Stabilizer, Hub) is an all-new concept; the super-sized Hub acts like a Doinker on steroids to reduce bow torque, noise, vibration and shock. Black and Silver versions are offered in 2.5-, 6-, and 12-inch lengths, with weight customization from 6 ounces up to 2 pounds, 14 ounces! (661-948-7900; www.Doinker.com)

Carter Rx Release Aids

New Rx series releases (208-624-3467; www.carterenterprises.com) are fast, quiet and accurate wrist strap releases with adjustable trigger tension. Their magnetic, self-closing open-hook design is ideal for

string loops. The Rx2's reverse pivoting hook allows the string to exit the jaw away from the face; the Rx1 uses a standard position hook opposite the index trigger.

Carbon Express Nano-Pro Arrows

The Nano-Pro from Carbon Express (800-241-4833; www.carbon-expressarrows.com) is a new nano-carbon arrow designed specifically for FITA, NAA and NFAA long-distance field shooting. Engineered with lightweight-yet-strong 46-ton carbon, the small-diameter Nano-Pro recovers fast and delivers flat trajectories with superior down range accuracy. It will not take a permanent bend.

It doesn't get any better than this...

The perfect shot AND the perfect bowstring

There's a good reason why BCY 452X bowstring material is supplied as original equipment by most major bow manufacturers:

- Absolutely no creep
- Superior stability
- Very good speed and durability

PLUS:

- The widest range of single and two color material
- Same day personal service and advice from people who really know archery
