

THE **BOWFILE** FROM **LAKEWOOD PRODUCTS** gives you the security of a hard case with the ease of use found in a zippered soft case. The Bowfile features soft-sided padding, yet its internal-aluminum support structure is rigid enough for airline travel. It has a top zippered opening, which enables you to drop in your bow (with quiver and accessories attached) into its fully padded chamber. The case

Products  
Bowfile

is designed for parallel-limb-style compound bows and comes in three sizes: 37, 41 and 45 inches. The side compartment holds arrows and extra gear. Contact Lakewood Products at: (800) 872-8458. (\$149.99 black or camo; for an extra \$10 you can have your name embroidered on the side)

The **TERMINATOR LITE HUNTER MATHEWS EDITION ARROW** from **CARBON EXPRESS** is a high-performance, high-value carbon-composite hunting arrow with superior strength and straightness.

Carbon Express Terminator Lite Hunter Mathews Edition Arrow

The Lost Camo arrow's innovative Built-in Weight Forward Technology increases downrange accuracy, and its BuffTuff arrow finish is quiet and tough. Blazer Vanes are used for added velocity. Available only at authorized Mathews Dealers. Contact Carbon Express at: (800) 241-4833. (\$114.99/per dozen)

**RAGE 40KE BROADHEADS** are specifically designed for bowhunters with short draw lengths and/or light draw weights, archers who generate less than 40 foot-pounds of kinetic energy. This 100-grain, two-blade broadhead has a 1½-inch cutting diameter with a blade angle that's swept back slightly more than the original 2-inch-cut 2-Blade design. The rear-deploying SlipCam is fully deployed by the time the blades make impact with no loss of kinetic energy, and the Shocklock System holds each blade in place without the need for rubberbands. Contact Rage at: (715) 395-0020. (\$44.99/three pack with a practice head)

The **WRIST WRAP BOW SLING** from **OUTDOOR PROSTAFF** is comfortable, easy to adjust and enables bowhunters to release an arrow without torquing the bow grip. Wrist Wraps are made out of water-resistant neoprene and come in several unique designs for the hunter who wants to customize his or her bow. Available in Realtree camo or various outdoor designs, including barbed wire, deer tracks, flame arrow and turkey tracks. Contact Outdoor Prostaff at: (260) 637-6704. (\$10.99)

Norway Industries  
Fusion Vane

**NORWAY INDUSTRIES' 2-inch-long FUSION VANE** minimizes crosswind interference while maximizing broadhead flight and stabilization. Two different proprietary polymers were combined to create the base and blade of the vane, which

Rage 40KE Broadheads

were then "fused" together. The vane blade employs a stiffer and more durable structure with a distinct texture and a slight taper from base to top. The vane base is created from a softer polymer for superior adhesion.

In addition, the soft base allows for the vane to react to contact or crushing more like a traditional feather, but with the resilience and weatherproof capabilities of a vane. Contact Norway Industries at: (800) 778-4755. (\$11.49/36 pack) NAB
