Blue Light Special

G5 G FORCE LIGHTED NOCKS

The force of an arrow release is all that's needed to activate G5's new G Force Lighted Nocks. The G Force emits blue light from a high-output LED and can be turned off by tapping the nock on any available hard surface. The G Force runs off a replaceable battery that will provide up to 20 hours of use.

Fast Fletching

EXTREME ARCHERY PRODUCTS TEAM REALTREE SHRINK FLETCH

For 2009, Extreme Archery Products partnered with Realtree to produce Team Realtree Shrink Fletch. Simply slide a Shrink Fletch unit over the nock end of your arrow, position it properly, dunk it in hot water, hold for the required amount of time and take out of water. Voilà — instant fletching applied! The Team Realtree Shrink Fletch comes in a black tube (arrow wrap) with Team Realtree logo on it and with three, two-inch Realtree Hardwoods camo Bohning Blazers.

Stabilization Wonder

The Aerovane II from Firenock LLC eliminates flight noise and helps stabilize broadhead flight. Now bowhunters can fletch their arrows straight and not worry about how offset or helical. At 4.7

FIRENOCK, LLC AEROVANE II

grains, Aerovane II's have a built-in wind channel that aids its structural flexibility.
